

Week 8

Prepositions

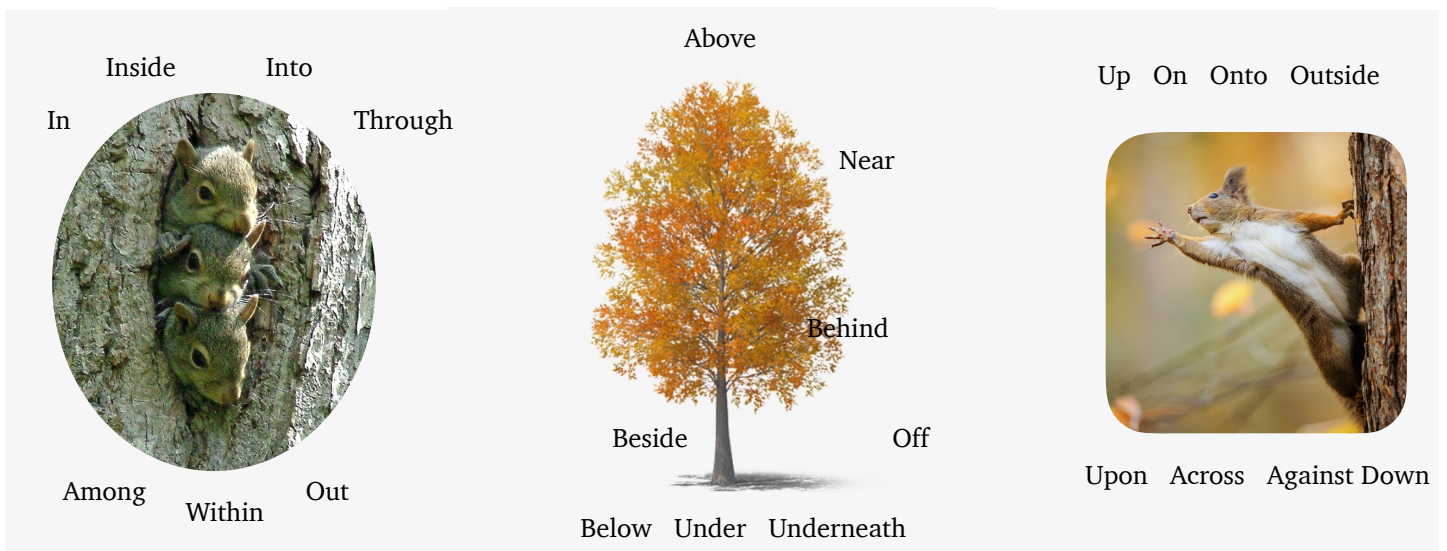

Preposition:

A preposition relates a noun or pronoun to another word. They:

- ▶ can be found anywhere in a sentence.
- ▶ are always followed by a noun which is the object of the preposition (OP).
- ▶ the preposition, the OP, and the adjectives between them create a "prepositional phrase"
- ▶ function as an adverb or a adjective in a sentence.

A preposition is anywhere a squirrel can go!

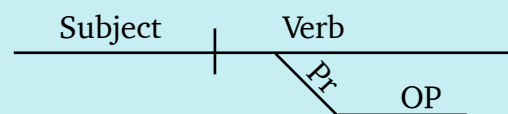

One way to recognize a preposition is that it can often be used to describe where a squirrel can go in relation to a tree - its (pre)position. **Not all prepositions fit this rule**, but it's a good place to start!

Vocabulary:

Adverbial Prepositional Phrase:

Modifies a verb, adjective, or adverb.

Adjectival Prepositional Phrase:

Modifies a noun or pronoun.
